

CHAMBER SILENCER EV05 WITH ELECTRIC VALVE SYMBOL: PROM.EV05

Chamber Silencer with Electric Valve EV05. The throttle allows you to choose between quiet and loud modes, so the muffler will work well both on the track to accentuate the sound of the engine and on the highway during a long drive.

The muffler can be used in the beginning/middle section of the exhaust system or in the end section.

If the muffler is installed in the end section, it is possible to select the appropriate exhaust tips with an intake diameter of 63.5 mm

Silencer with a straight-through construction

- Made entirely of polished acid-resistant steel T304
- Fully welded, hand finished
- Each element made with CNC technology
- Fully manufactured in Poland
- 24 months warranty

The interior of the muffler consists of:

- Stainless steel perforated tube
- Stainless steel wool resistant to 1100 degrees Celsius temperature
- Fire resistant full bristle glass mat
- Stamped bottom resistant to cracking

Kit includes:

- silencer with valve (left or right)
- control panel with two remote controls
- wiring

Dimensions of the muffler:

- Length of the muffler box - 300 mm
- Total length - 530 mm
