

CATBACK HYUNDAI i30N 2.0 T-GDI

SYMBOL: PROM.i30N/CATBACK

includes the following components:

940106 - The front pipe with a diameter of 76 mm, designed to fit the original exhaust system.

940107 - The connecting element between the midsection of the exhaust system and the rear silencer.

940108E - The rear silencer is designed to be mounted under the original throttle system installed in the car, with direct control from the interior. When switching to the sport mode, the exhaust gases are emitted from two tailpipes, emphasizing the sporty character of the car.

Thanks to the ability to switch between driving modes, the Catback exhaust system for the Hyundai i30N 2.0 T-GDi adapts to your preferences and road conditions. In sport mode, the exhaust gases are emitted through two tailpipes, not only emphasizing the sporty character of the car but also generating a deep sound that adds excitement and adrenaline during dynamic driving. In Eco/Normal mode, the rear silencer effectively reduces noise.
