

SYMBOL: EVP01

DESCRIPTION:

The throttle allows you to choose between quiet and loud modes, so the muffler will work equally well on the track to accentuate the engine sound or on the highway for longer rides.

Silencer of through-body construction:

Made entirely of polished T304 stainless steel

Fully welded, hand-finished

Each element made in CNC technology - Fully manufactured in Poland

24 months warranty

The interior of the silencer consists of:

Stainless steel perforated tube

Stainless steel wool resistant to 1100°C

Fire resistant glass mat with full hair

Stamped bottom to resist cracking

Kit includes:

silencer with valve

control panel with two remote controls

wiring

Additional information:

Stainless steel embossed damper with integral damper

Valve type - Electric

Pipe diameter - 63,5 mm

Height x width x length of the silencer box - 120x350 mm
