

DOWNPIPE HYUNDAI I30N 2.0 T-GDI

SYMBOL: PROM.I30N

Options to choose:

PROM.I30N - Downpipe with start pipe and V-band included.

PROM.I30N+SILENCER - Downpipe with initial pipe in set with muffler and V-band.

PROM.I30NS+SILENCER - Downpipe with silencer in a set with an initial pipe with a center silencer and a V-band.

PROM.I30N+S - Downpipe with silencer in a set with a starting pipe and V-band.

The Hyundai i30N downpipe has the following connections:

- Socket for lambda probe (the cable of the lower lambda probe must be extended because the original lambda probe setting is not possible)
- Two sockets for temperature sensors,
- Socket for vacuum sensor,
- Three bushings without holes - for attaching the original heat shield,
- Reinforced mounting to stiffen the structure.
